CAREER SUMMARY

With 3 years of experience in IT Infrastructure and Network Engineering, I have developed strong expertise in designing, implementing, and managing reliable IT infrastructure that enhances operational efficiency and business performance. I am seeking an opportunity with a forward-thinking organization where I can leverage my technical expertise, continuously expand my knowledge, and contribute to the company's growth while advancing my professional career. I am committed to delivering innovative, scalable, and secure technology solutions that create long-term business value.

SKILLS

- **Networking:** MikroTik, Cisco Switching, OLT/ONU, LAN/WAN, Routing & Switching, IP Addressing & Subnetting, VLAN Configuration & Management
- **Cloud & Server:** AWS, Amazon EC2, WHMCS, WHM, cPanel, Nginx, Apache, Mail Server Administration, TrueNAS, Hyper-V
- **Identity & Access Management:** Active Directory (AD), AD Security Policies, Organizational Units (OU), Microsoft Entra ID, User & Access Management
- **Security:** Wazuh, Threat Detection, Security Monitoring, Endpoint Security
- **Monitoring Tools:** Zabbix, The Dude, Cacti, Network Monitoring
- **IT Operations:** IT Asset Management, IT Helpdesk, Asset Tracking, Hardware & Software Inventory

EXPERIENCE | Total 3years+ Experience

IT & Infrastructure Executive | Betopia Group

Apr 24 — Present

- Manage and maintain IT infrastructure, network devices, servers, and endpoint systems to ensure reliable day-to-day operations.
- Monitor network performance, troubleshoot connectivity issues, and maintain stable network availability.
- Implement network security controls and monitor unauthorized access attempts to protect IT resources.
- Administer Active Directory, user accounts, OUs, security policies, and access permissions.
- Manage and maintain corporate mail server infrastructure and resolve email-related issues.
- Manage access control systems and supporting servers, including configuration, monitoring, and maintenance.
- Diagnose hardware and software issues, perform preventive maintenance, and ensure smooth and uninterrupted IT operations.

Network Support Engineer | Business Zone Ltd

Sep 23 — Mar 24

- Configured and maintained MikroTik routers, OLT, ONU, and wireless devices for ISP and client networks.
- Supported internet connectivity and network performance issues for multiple clients, ensuring reliable service delivery.
- Monitored network performance to ensure stable and reliable connections

PROJECTS

Office IT Infrastructure & Network Deployment

- Structured Network Cabling
- User Desk Network Deployment
- CCTV Camera Installation & Positioning
- Router & Switch Configuration & NVR Configuration

Project Scope: Designed and deployed the complete IT infrastructure for an office floor, including structured network cabling for all user workstations, CCTV camera installation and positioning, router and switch configuration, NVR setup, network connectivity, and end-to-end testing. Designed and deployed the complete IT infrastructure for an office floor, including structured network cabling for all user workstations, CCTV camera installation and positioning, router and switch configuration, NVR setup, network connectivity, and end-to-end testing.

EDUCATION

Dhaka International University
BSC in Computer Science & Engineering

2026- Ongoing

Feni Computer Institute
Diploma In Engineering In DTNT
CGPA: 3.59 Out of 4

2019 - 2023

PROFESSIONAL TRAINING AND CERTIFICATION

OCNA
AWS Cloud Practitioner Essentials
Oracle Cloud Infrastructure Certified Foundations Associate
IT Support Specialist
Ethical Hacker
CCNA
MTCNA
FTTx Deployment
